

QUALITY POLICY

For over twenty years our Organization is designing, manufacturing, and servicing valves, actuators, and control systems according to European Directives 2014/68/EU (PED), 2014/34/EU (ATEX), oil and gas standards API 6D, API 6DSS, API 6A and customers requirements.

Our competence and experience, the sensitiveness to change, the capability and quickness of adaptation are the characteristics that most distinguish us.

We consciously operate according to a Quality Management System that respects ISO 9001: 2015, API Q1 9th Ed. and European Directive 2014/68/EU principles.

Top Management, in making Quality one of the key elements of its strategy, establishes and supports the following objectives to be pursued at all levels:

CUSTOMER SATISFACTION

- Supply products compliant to required requirements
- Anticipate customer needs, through innovation
- Respect the contractual delivery date

PROCESSES IMPROVEMENT

- Seize opportunities and prevent risks
- Optimize resources and make processes more effective
- Analyze and reduce internal and suppliers non-conformities

ORGANIZATION DEVELOPMENT

- Behave safely, respecting ethics and the environment
- Promote the growth of skills and awareness
- Share knowledge
